REPORTS FROM MINING CAMPS

MOVEMENT OF IRON ORE ABOUT TO BEGIN.

Contracts Made for Carrying Over 20,000,000 Tons-Investments in the Arizona Copper Fields-Butte District Production - Alaska's Gold Yield.

DULUTH, Minn., April 30.-Shipping has been chartered for more than 20,000,000 tons of ore in the past few days. All this is to be taken at Lake Superior ports and at Escanaba, which is the only ore-shipping point on another lake, and is to be delivered at various Lake Erie points. The rates have been fixed at 86 cents a ton from the head of the lake, Duluth, Two Harbors and Ashland: 75 from Marquette and Presque Isle and 65 from Escanaba. It is estimated that the 20,000,000 tons represent a total revenue to vessels of about \$16,000,000, and that out o this modern steamships will be able to pay dividends of from 10 to 15 per cent., less depreciation charges. It is figured that this represents about two-thirds of the season's ton-The United States Steel Corporation will carry on its own ships about 9,500,000 tons of the total, and this will be its own ore. It is necessary for the company to charter many outside ships, and of these it has taken more than 3,000,000 tons so far. The remainder of the gross chartering has been by outside From now on ore will move freely shippers. and very fast, if there are no labor troubles to interfere.

Just at this time there is a strike among

stemm shovel operators working for the Steel Corporation but it has little effect and is likely to be settled in a few days. But shipments from the giant open pit mines of the company on the Mesabi range are now limited to what ore can be handled in other ways than by shovel. Some of these open pit mines have also shafts and underground workings, and secure a part of their tonnage from them. This is especially true of the Fayal, which is working three big shafts in addition to two immense pits. The Fayal mine is preparing to sink a fourth shaft, the new one to be in rock. Explorations are now under way on the

Rust lands of the Steel Corporation lying between the mine of that name and the village of Hibbing, and an immense tonnage of iron s being shown up. Half a dozen drills are engaged in this work and will be there for a long time. This land has been known to contain ore; but of the extent and depth of the deposit little has been learned until now. The Mahoning Ore and Steel Company is also exploring its lands adjoining and west of the Hull mine and is getting much ore.

Preparations for double tracking the entire ore-hauling lines of the Great Northern road on the Mesabi range and to Duluth

are in progress and will be carried out this A mine containing only about 150,000 tons of ore is being opened on the eastern Mesabi range and another of not to exceed 300,000 tons is to be opened this year. These are the first small-ore bodies opened on that range, and they show how much more care-

fully than ever in the past the miners are now

Recent excitement over what was called the new Highland iron range has subsided, and there is now none to questi on the prediction, made early in the boom, of its utter collapse when spring came. LAKE SUPERIOR COPPER

HOUGHTON, Mich., April 30.-May opens in the Lake copper district with a foot of fresh snow, and the present outlook is for a later season than was anticipated. Not all of the old snow had left the woods, and the fresh fall will delay spring exploration work until May 10 or 15. There will be more exploring done this year than for several seasons past, not only in Houghton, but in the adjoining counties of Keweenaw and Ontonagon.

There is no cessation in the activity noted for extrapl months and in the livestment.

There is no cessation in the activity noted for several months past in the investment by Lake Superior people in Arizona copper properties. The Boston investors held aloof until very recently, but are now beginning to invest in the mines and prospects of the Bisbee district. There is no question that the Lake people have been sellers of their local shares during the past eighteen months and that the bulk of the money so withdrawn, and millions more, has been placed in Western mining ventures, mainly in Cochise county, Ariz.

Ariz.

The Quincy and Arizona Development Com-The Quincy and Arizona Development Company was organized on Thesday by local people. The claims are two miles southeast of Bisbee, with an area of thout 240 acres, and are held under bond and lease at \$140,000.

The Hedburg claims, in the Bisbee district, will be taken by a company of Hancock, Houghton and Calumet people to-day, probably with a nominal capitalization of \$500,000.

Capt. James Wilcov of the Mass Consolidated Mining Company has options at \$075,000 on a well-located group of claims lying near the Calumet and Arizona, and contemplates the promotion of a million-dollar corporation to take them.

The Bisbee and Superior Development Company is partly organized and holds nearly thirty claims northwest of Bisbee. A syndicate of local and Chicago people has located twenty-seven claims adjoining the Superior and Risbee, but will not organize for the present. There are several other mining deals on foot.

present. There are several control of the present o

t is expected that all of the modern stamps It is expected that all of the modern stamps of the Osceola, seven in number, will be dropping early this month. This will require nearly 4,000 tons of rock daily, rendering the Osceola second only to the Calumet and Hecla in the quantity of rock stamped, and second only to that mine in the production of refined copper secured. Eastern figures, giving the average return of the Osceola at only 16 to 18 pounds of copper a ton, are misleading, for the reason that the low figures named hold good only for the Osceola mine proper, which is now the small end of the Osceola Consolidated. The rich ground in the Kearsarge mines should bring the average for the entire Osceola Consolidated up to nearly 25 pounds of ingot copper a ton of rock crushed.

The work of remodelling the Adventure mill has been completed, and both mine and mill are running smoothly, and with much better results than when the mill first went into commission.

The assessment of \$1\$ a share on Phœnix was expected by local shareholders. Repeated delays in the receipt of machinery and structural material have set back the date of beginning production, which will probably be about July next. The underground conditions at the mine are satisfactory.

The Champion mine is now supplying about

ground conditions at the mine are satisfactory.

The Champion mine is now supplying about 1,300 tons of rock daily to the mill. It is apparent that the milling facilities planned for the mine are far below the possible productive capacity of the mine, and a second mill must be built. The Champion is such a large mine that the major portion of its net earnings for several years may be required to increase its mining and milling facilities, but at the end of that time, with a productive capacity of about 400,000,000 pounds yearly, the Champion will take its proper rank among the greatest producers on the globe.

The Copper Crown Mining Company, which is reopening the old Hamilton mine, west of the Ontonagon River, is driving a tunnel and sinking a shaft simultaneously. The present owners seem to have faith in the mine and are setting about their work intelligently.

The Winona continues to furnish a little more than 200 tons of rock daily to the stamp operated in the Atlantic mill, and secures good mineral returns therefrom. The mine could readily furnish more rock if the shaft were supplied with a rock house and other facilities required for economical production upon a large scale.

The Franklin mine is now making money

facilities required for economical production upon a large scale.

The Franklin mine is now making money on a 15-cent market, and, with a continuation of present prices for a year or two, will work into very good shape, financially and physically. The Franklin has made a gallant fight to continue its corporate existence in the face of the rapidly approaching exhaustion of its original mine, and the bulk of its production is now being secured at an actual profit from the Junior mine, a property thoroughly discredited by two previous failures, in which considerably more than a million dollars was lost. MONTANA.

MONTANA.

BUTTE, April 27.—The Amalgamated Copper Company is at present working all of its mines to their full capacities and is producing from the combined mines of the Anaconda, Boston and Montana, Washoe, Colorado and Butte and Boston companies 10,000 tons of ore daily. Of this amount 5.400 tons are shipped to the new Washoe smelter at Anaconda for treatment, and the remainder to the Boston and Montana smelter at Great Falls and to the Colorado smelter in Bette, the Heinze mines at the same time yielding 1,500 tons a day. It is estimated that the independent mines of the Butte district are yielding about 3,000 tons, making a total from all the mines of 14,500 tons.

Although figures are not obtainable, it is estimated that the ore of the Butte district now being mined will average 4 per cent. Copper. The total output will be greatly ingreased when the Pittsburg and Montana

Mining Company has its amelter completed and begins taking out ore from the new mines on the east side of Butte. Work is being pushed rapidly on the smelter, and it is pro-posed to install one furnace and then begin operations in the mines and increase she capacity of the smelter as the output of the mines demands.

posed to install one furnace and then begin operations in the mines and increase she capacity of the smelter as the output of the mines demands.

Work has been suspended on the Emma mine, which property has been developed by the Butte Mining and Development Company for two years, owing to the fact that the company has been unable to raise the money necessary to go on with the development. It is thought, however, that the suspension of work will not be for more than two or three months, when the company hopes to have \$100,000 in the treasury ready for the resumption of work.

Butte capitalists and others are figuring on the erection of a zinc smelter in Butte to treat the vast quantities of zinc ore in the Emma and Alice mines. There are millions of tons of the ore in the Alice. The ore also carries considerable gold and silver. The Alice is an old silver mine, and in the early development of the property Marcus Daly took out of it \$4,000,000 in gold and silver, and in the following fourteen years others took out \$17,000,000. During the past few years, since the fall in the price of silver, the mine has not been operated to any great extent, but when a process for separating zinc from gold and silver is perfected to the extent of reducing the expense of treating to a minimum, the Alice company will again work its Butte mines.

The Golconda Gold Mining Company has been incorporated to work the Golconda group of mines in the Jay Gould district, adjoining the Jay Gould and Homestake properties, which have produced more than a million dollars. There are 3,000 feet of tunnels on the property, which will be developed and worked with a view to operating the mill this season. The company will install a cyanide plant to work the tailings.

A new strike had been made in the Fortune mine near Virginia City. The ore assays \$90 a ton in gold and is three feet wide.

Supphires from the Burke & Sweeney mines at Yoga will hereafter be cut at the mine, a force of lapidaries having been brought out for that purpose.

It is report

ALASKA.

ALASKA.

SEATTLE, Wash., April 27.—The gold washing season on all the creeks in the Klondike district began on Saturday. The Canadian Government has announced that it will neither establish a mint at Ottawa, nor one assay plant at either Vancouver or Dawson this year, and the merchants and business men of Dawson having announced their determination not to pay more than \$14 and ounce for gold dust, the field is left wide open to the United States Assay Office and banks and merchants of Seattle, who will buy the dust and give a good price for it. This means that \$15,000,000 in golddust will fall into American hands from British soil within the next few months, for this is the amount which the most conservative mining men estimate the Klondike mines will produce this season. This, added to the product of Nome, Tanana, Cook Inlet. Rampart and Forty-Mile, will swell the grand total of gold production in the North to at least \$33,000,000. This golden stream will begin flowing by the middle of May and will last till the middle of October. The Government Assay Office is preparing for a very active season and will be in position to handle all the golddust offered.

Parties from Eagle who have spent the winter on the Tanana, making the most thorough investigation, confirm the reports of rich diggings on Gold Stream, Cleary and Pedro, which streams, they state, have been prospected for fully fifteen miles, and express themselves as being perfectly satisfied with what they have seen. Pedro Creek has been prospected more thoroughly than any of the others, and there are several dumps along the stream awaiting spring before washing begins. It is from fifteen to eighteen feet to bedrook, and there are several dumps along the stream awaiting spring before washing begins. It is from fifteen to eighteen feet to bedrook, and there are several dumps along the stream awaiting spring before the pay streak.

Judge Wickersham, who has been holding court at Forty-Mile and Circle, concluded

and there was no limit, apparently, to the pay streak.

Judge Wickershem, who has been holding court at Forty-Mile and Circle, concluded to visit the Tanana country and make personal examination. His report will be awaited with a great deal of interest.

Travel to the mines is rendered more difficult by reason of the melting snow, and the hundreds now on the way in from Dawson and Valdes are not enjoying the trip. NEVADA.

NEVADA.

RENO, April 28.—The first shipment of ore from the Montana-Tonopah mine to Salt Lake was made last week. It is estimated by the men who sacked the ore that it would run up to \$20,000 to the carload, one-third of this amount being gold. This spipment will be followed by others, as the ore body is large and increases in value as the shaft goed down.

goes down.

The deepest mine at Tonopah is now the Desert Queen, which is down 770 feet. It has just struck the third ledge, a "stringer," about a foot wide, which carries free milling about a foot wide, which carries free mining ore worth \$20 a ton.

In the Valley View shaft of the Tonopah company bonanza ore is still taken out. On the 300-foot level of the last drift a ledge seven feet wide has been struck, which gives ore assaying from \$75 to \$1,000 a ton in gold and

All the mines around Tonopah that are down to the ledge are shipping good ore.

The Wilson mines at Pine Grove will be unwatered and developed. A 5,000-foot tunnel will be driven into the mountain to tap the Wilson ledge. These mines have already produced \$5,000,000, but they were abandoned because of the heavy flow of water, which could not be checked. Good ore was found 150 feet from the surface. The present intention is to tap the ledge several hundred feet deeper. feet deeper.
In Olinghouse Cafon W. C. Williams is taking out some of the richest ore ever found on this coast. The vein is holding out well and much of the ore runs to \$20,000 a ton.

CALIFORNIA.

San Francisco. April 27.—The discovery of rich ore in the Polar Star mine has revived the old mining town of Cherokee in Nevada county. The strike was made in one of the tunnels at a distance of 150 feet. The ledge is from four to ten inches wide and the ore assays \$160 a ton. Cherokee has been dead for several years, but this strike in a mine that was regarded as played out will give the whole district a boom.

The Gold Fields of California, Limited, is the title of an English company that has just completed the purchase of the score of mines in the Ogilvy district of San Diego county from the Free Gold Mining Company. The English company pays \$2,400,000 for the properties, \$50,000 down and the remainder in stock. The new company will increase the capacity of the cyanide plant from 200 to 1,000 tons daily.

The smelter of the De La Mar copper mine, which has been idle since Oct. 22, will start up again next month with 100 men. The six months' idleness of this mine has had a bad effect on the whole Bully Hill copper district, as it has thrown several hundred men out of work.

A \$6,000 pocket was taken out last week from the Sugarman mine at Bald Mountain, Tuolumne county, near the place where recently \$3,000 was found in one pocket. CALIFORNIA.

DEADWOOD, S. D., April 28.—The statement

MINING PUMPS.

THE CAMERON, in use the world over, and conceded to be the most serviceable, durable and effective Station and Sinking Puunps on the market to-day. Often imitated, never equalled. Write for satalogue and prices to the

A. S. CAMERON & TEAM PUMP WORKS.

Foot East 23d at., New York city, U. S. A.

issued by the directors of the Spearfish Gold Mining and Reduction Company, that the April dividend had been passed, coming without any explanation, created constersation among the shareholders. This has been allayed, however, by the declaration of the superintendent, O. N. Brown, that the object was to do away with the monthly dividends and distribute the net earning quarterly hereafter. Instead of a one-cent dividend for April, a three-cent dividend will be paid in June.

The Deadwood-Standard Gold Mining Company is making a good record for April, not-pany is making a good record for April, not-sith tonders the the weather has inter-

will be paid in June.

The Deadwood-Standard Gold Mining Company is making a good record for April, not withstanding that the weather has interfered somewhat with the operations of mine and mill. The mill clean-ups have been made on time, and the result has compared favorably with any previous thirty days run at this plant. The company has appropriated money for the enlargement of its present mill from 125 to 250 tons daily capacity. This will be accomplished by the addition of tanks in the leaching department. Experiments that have been under way at the Homestake for the last year or more are said to have resulted in the perfection of a method by which the gold contained in the slimes may be readily and cheaply extracted. This will mean an enormous saving to the company and it is asserted that a slimes plant is to be built in Gold Run guich, immediately below the large cyanide plant. The slimes are to be conveyed to the new plant from the eyanide plant after separation from the slands, and upon being discharged at the slimes plant practically all the values contained will have been saved. The process is an invention of T. J. Grier, superintendent of the Homestake company, who has been engaged upon it for a long time. The Homestake now holds the record for the plant treating the greatest quantity of ore per day, for economy in the cost of handling the ore and for despatch. No effort is made to save the gold in slimes at the present plant. is made to save the gold in sining at the present plant.

The Ellison shaft of the Homestake has reached the bottom level of the mine, 1,100 feet deep, making three shafts that the company now has to that depth.

pany now has to that depth.

BRITISH COLUMBIA.

SEATTLE, Wash., April 27.—The Providence mine in Greenwood is making a good record as a shipper of high grade ore, the last shipment made during the past week netting \$236 a ton, giving a total for the week of \$5,000. This mine was among the first discovered in the district, but was closed for several years.

in the district, but was closed for several years.

The O K and White Bear mines in Trail district began shipments last week, the ore, which is free gold, netting \$3,600 to the car. This ore is sent to the trail smelter, and commands a ready market. Le Roi, War Eagle. Center Star and Le Roi No. 2 are all making regular shipments, the total for the week being 4,500 tons.

On the southeast arm of Quatsino Sound Vancouver Island, a great deal of development work is being done and considerable high grade copper-gold ore is accumulating on the dumps. This district is one of the most promising in the province, and, besides the rich copper-gold ores, has an abundance of the best coking coal discovered in the Northwest. Smelting plants are among the improvements contemplated.

WASHINGTON. WASHINGTON.

SEATTLE, April 27.—The placer mines on Swauk Creek, Kittitas county, on the eastern slope of the Cascade Mountains, are now in active operation under the management of Philadelphia capitalists, and they are yielding good returns. During the past week nuggets valued at from \$50 to \$150 apiece were washed out, and this is an every day occurrence.

SALT LAKE, April 27.—Old gold bearing properties at Cain Springs, in the Deep Creek country, have passed into the hands of an Eastern syndicate. It was upon this group that the first mill in Deep Creek was built, and it was from that plant that the first bar of gold builton was brought from the Deep Creek country into Salt Lake.

Developments along the ledge opened up in the Kempton of Bingham indicate the presence of the largest ore body of the kind that has been uncovered in this camp. IDAHO.

Boise, April 26.—One of the greatest undertakings in Southern Idaho is a long tunnel to cut the mines of Black Hornet district, ten miles east of this place. The company owns the Mammoth claim, which has been fairly developed. It is also the intention to erect a smelter during the summer, as the ores of the district are all base and cannot be successfully worked in ordinary stamp mills. mills.

The Sunnyside tunnel, Thunder Mountain district, is in nearly 600 feet. The amount of ore, which will average \$4 per ton, is practically inexhaustible.

ATTACK ON ATHLETICS. A Celumbia Publication Thinks It Is Time to Record a Protest.

Columbia Literary Monthly for May, which will appear to-day, will contain a long editorial on the athletic régime on Morningside Heights, in which the student editors point out that sports are coming to be the only things which seem to count in Columbia's undergraduate life. A part of the editorial follows:

The strenuous life seems to be the only life, in popular estimation, that counts at Columbia. The man whose brains are in his arms and legs is a little tin god: but it appears that it might not be disadvantageous if a higher estimate were accorded to that curious creature the man who has brains in his head. It is but the natural course of undergraduate sentiment everywhere to appreciate successful athletes more than those who are successful in less muscular activities, but we question strongly whether this sentiment is so sturdily developed at the other big colleges as it is here at Columbia. A more or less mild assumption of this attitude is but natural, and possibly quite correct; where, however, athleties become the all in all, and the absolute ideal of a majority of Columbia men, it seems time to record a vigorous word of protest. a vigorous word of protest.

Forrest A. C.'s Outdoor Games.

The first regular weekly outdoor games of the Forrest A. C. were held at Williamsbridge yesterday morning. The club was organized recently and comprises several of the scholastic cracks of The Bronx. The events were well contested, especially the 880-yard run, in which the three competitors

Gardner and Hart to Fight.

An important match was arranged on Sat urday between Marvin Hart, the crack Louis middleweight and George Gardner They have signed articles to fight twenty rounds before the Southern A. C., Louisville, on May 13. Gardner has defeated such clever puglists as Kid Carter, and Jack Root, who whipped Kid McCoy recently; Hart has an unblemished record and a stiff fight is expected.

DEAD HEAT ON THE SPEEDWAY

LAMAR AND BILLINGS PACERS IN HARD STRUGGLE.

Ethel B.'s Wagon Overturns and the Mare Runs the Length of the Stretch on the Sidewalk-A Winning Day for Pet Raven-Queen Wilkes in Front.

A heat won by each and a dead heat between two stars was the reigning Speedway sen-sation yesterday morning. The driving throng was probably the largest of the year. Owing to the shelter afforded by the cliffs the searching wind did not sweep the Speedway stretches, and when the sun came out it was really pleasant.

David Lamar, behind the pacer Nathan

Straus, 2:05%, and C. K. G. Billings, with the pacer Hontas Crooke, 2:07%, met for the third time in a contest for supremacy, and at the end of three heats neither horse had gained any advantage. Nathan Straus won the first heat so easily that it was really not a contest after passing the quarter-mile post. The second heat was sensational. Far up the stretch the two horses could be seen struggling head and head, and it was plain then that each was under a stiff drive. Soon after passing the quarter-mile post Mr. Lamar began to use his whip, and from that point to the finish each owner worked with all the skill at his command to help hi favorite. It looked to the crowd standing near the

finish as though Hontas Crooke had a slight advantage, but it was only the deception of the angle of observation. When the two horses swept between the finishing posts no one present was able to say which had won. The third heat went to Hontas Crooke easily. Mr. Billings then took the reins behind the trotter Imogene, 2:11%, and started her against E. E. Smathers's champion trotter Queen Wilkes.

The ease with which Queen Wilkes beat Imogene robbed the event of interest. the second heat David Lamar sent Sally Simpson, 2:114, to make it three-cornered and he finished second to Queen Wilkes and

the second heat David Lamar sent Sally Simpson, 2:114, to make it three-cornered, and he finished second to Queen Wilkes and an open length in front of Imogene.

The trotter Glen mere Boy, 2:144, driven by Charles Weiland, and Freeland, 2:173, with David Goodman up, opened the sport, with the former the winner. Then Glenmere Boy was sent to tackle Little Helen, 2:154, driven by DeWitt C. Flanagan, and this time the veteran had to accept second place. Later Little Helen had a merry tilt with the brown trotter Fred Proctor, 2:174, driven by Nathan Ely, and this time Mr. Flanagan had to ride in second place.

John Hannon and the pacing mare Alietta, 2:154, were prominent. In her first three brushes Alietta finished in front of a pacer that was not identified, and then she was sent in a three-cornered brush against Ammond, driven by Thomas Greenbaum, and Palatina, 2:21, with A. Alexander up. As between Ammond and Alietta it was a pretty race, with the honors finally going to the former. Palatina was a length away.

Michael Reid rode to victory time and again behind his rapid-gaited little black trotter Pet Raven, 2:174, It was only a nice warming spin for Pet Raven to beat Belton, Jr., but she had to step faster when she met the bay trotter Crystal Chimes, driven by Andrew Crawford. Then Pet Raven beat the bay trotter Crystal Chimes, driven by Thomas Lynch, Jr., in commanding fashion. Later Mr. Crawford, with Belfry Chimes and Mr. Lynch, behind crystal Chimes, had two lively tilts and the former was each time the winner.

Frederick Dietz, behind the bay trotter first overton, 2:244, and David Goodman, with Freeland, had three heats, and in spite of an energetic drive each time Mr. Goodman was second. Nathan Ely and Fred Proctor proved a hard pair to beat. Only once did the Pawnee trotter finish in second place and that was when he met the trotter Sheving. 2:134, driven by Elmer Stevens. The best race Fred Proctor trotted was when he made a head-and-head finish with the trotter Kingmond, 2:09, driven by Chaus Bohlin

The black pacer David Muscovite, 2:17%, driven by Leopold Meyer, and the black trotter Mahlon, 2:18%, had two brushes and the pacer was each time the winner. When David Muscovite was sent to tackle the bay trotter Ellert, 2:11, driven by Anton Swartz, he fluished second. The trotter Americus, driven by J. E. Meyer, beat Beltoh, Jr., driven by Nathan Straus, three straight heats.

After winning with Queen Wilkes, Mr. Smathers drove Ida Highwood, 2:00%, and sent her three heats against Sally Simpson. Ida Highwood won the first heat in a drive, but she was unsteady in each of the others and came second.

An incident quite out of the ordinary occurred near the close of the sport. S. Maneck was driving the chestnut mare Ethel B., 2:20%, when one of the rein holders slipped, causing the mare to swerve and overturn the wagon. The mare soon freed herself from the wagon and took to the sidewalk, where she ran the length of the stretch. The crowd had warning in time to give her a clear road and when near Washington Bridge Mounted Policeman Maloney caught her.

ON BROOKLYN'S SPEEDWAY. Breaks by Redfox Lose Him His Match With Miss Elinor.

It was an active day from morning until dusk on the Brooklyn Speedway yesterday. The crowd got out in the forenoon in much greater numbers than usual owing to there greater numbers and usual owns of their being a match race on between Charles D. Strang's Redfox and Terry McGovern's Miss Elinor. The terms being half mile heats, best two in three, McGovern to drive his own horse and W. H. Strang, Jr., to drive Redfox. McGovern won in two straight heats. The first time down Redfox made a

heats. The first time down Redfox made a bad break in the middle of the journey and again toward the end. He crossed the line on a run ahead of Miss Ellinor, but the latter was going level and the judges gave her the heat.

The second time they scored even, but Redfox broke almost at the same time they got the word from the starter. He caught and made a gallant chase of it, but finished half a length behind. Strang declared that Redfox was forced out of his stride by the slashing of McGovern's whip, but the judges saw nothing of this, although Redfox was crowded over to the side of the road near the finish of the second heat. Strang, after the race, offered to make a new match for a good sized stake on the Parkway track, but Terry declined.

Howard Avery's Patsey, a newcomer, showed in fine form and beat all rivals encountered except G. A. Needham's Phylic. C. Moncrief's Isaac, John Irving's Chance and Trainer Arthur's P. H. Flynn, each had a try at different times against L. R. Acker's Camilla, 2119, driven by A. W. Warner, but each was discomfited. Phylic was in unbeatable form.

Events for Kentucky Trotting Meeting. LEXINGTON, May 3 .- At a meeting of the board of directors of the Kentucky Trotting Horse Breeders' Association the following renewals of the fixed events for the annual meeting, Oct.6 to 17, 1903, were determined Transvivania-For trotters eligible for the 2:12

Transylvania—For trotters eligible for the 2:12 class, \$6,000.

McDowall—For trotters eligible to the 2:10 class, \$5,000.

Wainut Hall Farm Cup—For trotters eligible to the 3:15 class, \$5,000.

Riuegrass—For trotters eligible to the 2:19 class, \$2,000.

Johnston—For trotters eligible to the 2:24 class, \$2,000.

West—For trotters eligible to the 2:29 class, \$2,000. ,000. Keniucky—For three-year-old trotters, \$2,000. Lexington—For two-year-old trotters, \$2,000. Tennessee—For 2:08 pacers, \$3,000. Wilson—For 2:20 pacers, \$2,000.

All of these fixed events excepting the Kentucky, for three-year-old trotters, and the Lexington, for two-year-old trotters, will be mile heats, three in five.

Handball. Experts were busy yesterday at the hand-

ball courts in Jersey City and Brooklyn and there was a big attendance. At Egan's court the results were as follows: the results were as follows:

W. Joyce and J. Ryan defeated T. Keegan and P. Fulte, 21—18, 15—21, 21—14. P. Burns and P. Dolan defeated J. Egan and J. Hanlon, 21—16, 19—21, 21—18. J. Fgan defeated P. Fulte (10 acces), 21—17, 21—19, 21—15. A. Martin and W. Joyce defeated M. Dunne and G. Barber, 21—15, 21—19, 16—21. T. Waldron defeated B. Echoff, 21—12, 18—21, 21—15. T. Waldron and J. Murray defeated J. Dobbins and M. O'Keefs, 15—21, 21—18, 21—18.

J. Plaherty and P. Dolan defeated J. Jackson and J. McCourt, 21—18, 21—16, 21—18. GEN. WINGATE TANGLED UP. How His Story to Lecturers Affected His Powers of Speec

Three hundred members of the lecturers' corps of the Board of Education met at their thirteenth annual dinner on Saturday night, at the Aldine Association, to listen to a history of the free lecture movement by Dr. H. M. Leipziger; to jokes, intentional and otherwise, by Gen. George W. Wingate. and to a homily on the joys of intellectual communion by Mayor Seth Low.

John Lloyd Thomas presided. Dr. Leipziger said that during the past year there had been given 116 public lecture course in the city to a total audience of 1,203,000 persons. Three lecture centres were started last March for the Yiddish and Italian population. Dr. Leipziger concluded by reading extracts from letters he had

by reading extracts from letters he had received in praise of the movement.

Gen. Wingate complained that Dr. Leipziger had so exhausted the subject that the only address left to him was "Brooklyn, where my wife is waiting for me." So he told about a colored girl who wanted a religious-minded negro to marry her and lamented that nobody loved her.

The negro's reply of "Jesus does," pleased the listening educators so much that their applause affected the General's powers of speech.

Mayor Low came in toward the end of General Wingate's address. After alluding to the fact that he had twice been enrolled in the free lecturing corps, he showed how in the city administration, as in school, the multiplication table is the root of all evil. "A man who has only number of ," he complained, "solves his water supply problem by digging a well."

He went on to say that the rewards of a teacher were the "finest that could come to any man." The true function of the lecturer, he pointed out, is not only to give enjoyment and information to his audience, but inspiration also.

SAYS JURY WAS BIASSED. Jim Howard Asks for a New Trial-Three Jurymen Accused.

FRANKPORT, Ky., May 3 .- There was a surprise in Judge Cantrill's court yesterday when the attorney of Jim Howard moved

Frankforr, Ky., May 3.—There was a surprise in Judge Cantrill's court yesterday when the attorney of Jim Howard moved for a new trial and filed affidavits of W. L. Graddy, H. F. Johnson and W. J. Wofford, all well-known Woodford county citizens, to the effect that Jurors Runyan, Renshaw and Carter C. Neal, before being summoned as venire men, expressed the opinion that Howard was guilty and that if they were on the jury they would vote to have the store of the property of the property of the theory of the organization and the property of the commonwealth's Actorney Franklin and Attorney Campbell had gone outside of the record and had discussed the previous trials of Howard. A counter affidavit was a summoned an opinion as to the guilt or innocence of Howard previous to the trial. The Commonwealth's attorney was unable to reach Juror Renshaw.

The creditors of J. Herbert Ballentine have been paid in full by the assignees, John R. Harden and Thomas W. Crooks of Newark. The balance is said to be much larger than was expected when the

much larger than was expected when the effort at straightening out Mr. Ballentine's affairs was begun last fall.

J. Herbert Ballentine is a member of the family of brewers in Newark and a grandson of the founder of the business. When he made an assignment last year his assets were estimated at \$1,300,000 and his direct lightlifting \$1,035,750, with contingent lightlifting \$1,035,000,000 and his direct lightlifting \$ were estimated at \$1,300,000 and his direct liabilities \$1,038,750, with contingent liabilities of \$846,280 incurred by him as indorser of paper. In the settlement which has just been made \$610,000 was eliminated because it is secured by mortgages. They are \$400,000 in bonds of the Pequod Club, secured by property of the Knickerbocker Athletic Club of this city, \$100,000 in bonds of the American Insurance Company and \$110,000 in the Lister Trust bonds. \$110,000 in the Lister Trust bonds.

The amount of the checks which were sent out yesterday is estimated at \$450,000.

FOOTBALL MANAGER ARRESTED. Programmes Sold, It Is Said, Instead of Tickets for Sunday Game.

Daniel Managan of 209 East Fifty-eighth athletic grounds in Laurel Hill, in Queens, was arrested at the opening of the grounds charged with a violation of the Sunday laws. The opening football game of the season between the O'Connells and the Kickhams, both of Manhattan, had been advertised.

Just before the teams lined up the detectives revived. No tickets were being sold.

Just before the teams lined up the detectives arrived. No tickets were being sold, but the detectives were barred from entering the grounds. They were directed to buy two programmes at 25 cents each from a man outside. After making their purchases they placed Manager Managan under arrest. He was taken to the Hunter's Point station house and released in \$500 bail. After the departure of the detectives the game went on. game went on. Railroad Deal That Means an Electric Line

From Indianapolis to Chicago.

INDIANAPOLIS, May 3.-The traction lines between Peru and Wabash and between Peru and Logansport were purchased yesterday by the Union Traction Company at a cost of \$800,000, the deal being finally closed in New York. The acquisition of the propor the projected electric line to Chicago from this city, and only a few miles of road will have to be built to make the connection. It is the purpose of the Union Traction Company to push the work of construction so as to fill up the gaps as fast as possible.

New Low-Fare Cunarder. Capt. Dutton of the Cunard liner Umbria

in from Liverpool and Queenstown, reports that when he left the line's new steamship Carpathia, built for second-class and steerage passenger trade, was preparing to make her maiden voyage from Liverpool to Boston. After returning to Liverpool she will enter the New York service. She is 500 feet long, measures 13,555 tons gross, has accommodations for 200 second-cabin and 1,500 steerage passengers.

TALE ABOUT CORBIN REFUTED.

HOW THE STORY OF THE BOB-TAIL FLUSH AROSE.

Started by an Ex-Army Officer Who Had Lost Heavily in a Poker Game-His Efforts to Make Amends for the Wrong

He Had Done the General's Reputation. PHILADELPHIA, May 3.- The Press this morning publishes the following despatch from a staff correspondent in Washington: A lie about a bobtail flush threatened t

disrupt the fashionable Metropolitan Club of The lie was a fact; the bobtail flush was not. The highest authority on poker in the world, the late Gen. Francis C. Schenck, has borne evidence to both; one of the greatest military authorities in the country has unjustly, but patiently, and as a gentleman should, remained silent, eyen though his reputation suffered as a result.

The facts about the Metropolitan Club

trouble, briefly, are these:
In the Metropolitan Club of Washington, as in all similar organizations, a very few objectors can thwart the purposes of a host of men. This was the case in the presentation of Gen. Corbin's name for membership in the club by Paymaster-General Alfred Bates Two men, one a professional other his henchman, by a skilful play upon the prejudices of others, succeeded in marshalling sufficient objection to deter the friends of Gen. Corbin from pressing his name. And yet one of the men, as the story goes, was a beneficiary, if not of Gen. Corbin, at least of his friends.

The story that Gen. Corbin had been guilty of ungentlemanly acts in connection with a certain game of cards is not ascribed to these men; it was the natural outcropping of a lie that has covered a quarter of a century which had its origin in a malicious and infounded statement circulated by a man who was, for the moment, personally aggrieved over a poker game in which he had suffered considerable loss. I have the story from a gentleman who is

cognizant of all the facts, and the omission of whose name from this narrative is due solely to the fact that he is one of the most

man who first gave the lie its impetus.

"The facts about the charge are after this fashion:

"Gen. Corbin, like many other men in army and navy life, delighted to indulge in a friendly game of cards with personal friends. One night at Gen. Schenck's house a game was in progress in which the stakes were rather high. One of the players, a former officer in the army, was a very heavy loser. Corbin was a winner. The efficer in question was a man well up in years who could not control his tongue or his temper. He left the game in an angry mood and declared it his opinion that Corbin's success was due to anything but fair playing. There was no charge of guilt, only the mean hint of a disgruntled man. A newspaper correspondent heard the story, amplified it, and that started the lie on its way. That was the genesis of the charge.

"After the story had appeared in print the army officer in question who had given currency to it endeavored in every way to repair his fault. He went so far as to write a personal letter to Corbin confessing his part in the affair and declaring that he had spoken falsely about the events of the evening. The age of the man, his manifest regret for what had occurred and the subsequent efforts of members of his family, to correct the falsehood led Gen. Corbin to seal his lips upon the subject."

WOMAN HELD FOR BURGLARY. In Her Room Was Found a Set of Tools -Two Boys Also Held.

Louis Capellini, 19 years old; Mamie Murphy, 23 years old, and August Ferrustreet, Manhattan, manager of the Celtic giari, 17 years old, were held in \$1,000 bail each in the Tombs police court yesterday on a charge of burglary. Ferrugiari was yesterday by Detectives Kennedy and arrested early Saturday morning with two Pendergast of the Hunter's Point precinct, other boys while robbing a grocery store other boys while robbing a grocery store at 98 Bayard street. When the boy was brought to the Eliza-

beth street station he told Patrolman Ross that he had been taught to steal by Capellini. He confessed that with Capellini he had stolen \$400 worth of cameras and lenses from a photographic supply company at 198 Grand street on March 27. The boy told Ross that he could find Capellini at 9 Pall street. 9 Pell street.

Ross went there, arrested Capellini, his

Ross went there, arrested Capellini, his brother Andrew and the woman. He found in the room occupied by Capellini and the Murphy woman a satchel containing a set of burglar tools, including a black mask, a dozen files, a circular saw and two jimmies. Several cases of lenses that had been stolen from the Grand street store were also found in the room.

Ross also arrested Samuel and Henry Jakonicke, proprietors of a second-hand store at 4 Bowery, where a number of cameras, said to have been stolen from the Grand street place, were found. They were discharged by Magistrate Cornell. Andrew Capellini was also discharged.

Princeton Theological Seminary Commencement. PRINCETON, N. J., May 3.- The bac-

calaureate sermon of the ninety-first commenoement of the Princeton Theological Seminary was preached to-day by the Rev. Dr. William Y. McEwan of Pittsburg. The graduating exercises and the meet-ing of the board of directors will be held on Tuesday.

Mrs. Thomas Barker Home From Europe

Mrs. L. A. Barker, wife of Thomas Barker, Keller of Arlington, N. J., was a second-cabin passenger by the Cunarder Umbria, in yesterday from Liverpool and Queens-town. She has been in Europe several months.

L. I. AUTO CLUB CONDEMNS. Adopts Resolutions Asking Governor to Veto Bailey Bill.

After the meeting at the Automobile Club of America on Saturday night, F. G. Webb treasurer of the Long Island Automobile Club, gave out the following resolution which was adopted by that club last Wednesday night, but not made public before in order to avoid prejudicing the action of the A. C. A. members: of the A. C. A. members:

Hon. Beniamin B. Odell, Governor of the State of New York,
Dear Sir: In behalf of the members of the Long Island Automobile Club and of hundreds of automobile users on Long Island, both for pleasure and business purposes, we respectfully protest against the action taken by the Senate and Assembly in passing the Batley-Doughty Automobile bill. Many of the clauses are so restrictive as to practically preclude the use of a self-propelled vehicle for any purpose and will work untold injury to a great and growing industry. We, therefore, respectfully ask that you exercise your executive authority and veto this most unfortunate and unacceptable example of misdirected class legislation. Yours most respectfully,
Louis R. Adams, president;
Lawrence Abraham, vice-presidents;
Abthur R. Pardington,
Edwin Mellyin,
Frank G. Webb.,
Nathan Beers, Jr. M. D.
